(Answers)

Recap activity

1. What is the **greatest** number you can make using all of the digit cards?
   953

Bronze	**Silver**
1. 181 < 260 < 320 2. 65 < 105 > 85 3. 511 > 501 > 481	Ascending order: **123, 132, 213, 231, 312, 321** Descending order: **321, 312, 231, 213, 132, 123** You might notice that the descending order is the ascending order backwards.
Gold	**Greater Depth**
False because sometimes two numbers will have the same number of hundreds and so you will also need to look at other columns. E.g. comparing 213 and 223- both numbers have 2 hundreds so I need to look at the tens to order and compare them.	There are many possibilities to this question. Here are some of mine: **565 556 655 646 664 466 763 736 637 673 376 367** Did you find any others?

2. What is the **smallest** number you can make using all of the digit cards?
   359
3. What are all of the numbers you can make **between 350 and 550**?
   359, 395, 539
4. Put all of the numbers you can make using all the digit cards into **ascending order**.
   359, 395, 539, 593, 935, 953
