

Year 5 & 6

LOOKING AHEAD TO SEPTEMBER!

Dear Year 5 and 6,

We hope this letter finds you well and full of curiosity!

We are thrilled to share some extraordinary news with you. Late last night, while exploring a remote part of Sherwood Forest, we uncovered a mysterious, glowing egg. This remarkable find has left us buzzing with excitement and wonder, as we believe it may contain a new species that has never been discovered before!

When you return in September, we're going to need your help. As young scientists and explorers, you have a unique chance to be part of this incredible journey. Your task will be to uncover the secrets of this enigmatic egg and help us understand what it contains. Have a look at the photo below and start making some predictions...

This is a magnificent opportunity to be a part of something truly special. Your findings could contribute to the discovery of a new species, and your names could go down in history as pioneers in the world of science alongside the likes of Charles Darwin himself! We can't wait to see what you uncover. Hurry back!

Best Wishes,

Mrs Allen, Miss Shaw & Miss Watson

Meet the teacher-

Wednesday 4th September (3.15pm)

Jeans for Genes Day-

Monday 16th September

Bring your grown up to school-

Friday 18th October (2.15pm)

National Holocaust Centre Visit (more information to follow) -

Thursday 9th January 2025

What is living inside our egg?
